

Atlas user manual

Atlas by Grammatical Features

The Atlas / By Grammatical Features page is divided into two sections: navigation (left) and map (right).

Search a feature

The navigation section consists of a search bar with a search text box and a search button, and a Table of Content (ToC) with a hierarchical tree structure positioned below the search bar. In the search bar the user can enter the name of the feature she wants to find.

Within the search bar, the user has two search modes available:

- "Search in All tree": All the tree nodes matching the name are selected.
- "Search by features": Only the tree nodes corresponding to the features matching the name are selected.

The modes are chosen by using the button located on the right of the bar.

Selection/deselection of features

A feature can be selected/deselected by clicking on the checkbox next to its name. It is also possible to select a subset of the possible values that a feature can assume. In this case, only the sign languages for which the feature has one of the selected values are displayed on the map.

A maximum of 3 features can be selected. Upon reaching this limit, the remaining checkboxes will be disabled.

Submit

Once a maximum of 3 features is selected the submit button must be clicked to view the corresponding sign languages on the map.

On the top of the map the features selected by the user are listed.

In the navigation section, under Relations, the legend of the symbols will be displayed, where each symbol stands for a possible feature value, or if more than one features are selected, for a combination of values.

In both cases, the black circle on the right reports the total number of sign languages that has that combination of feature values. It is possible to expand the section and obtain the complete list of the sign languages associated with this combination of feature values.

Remove features

In the Map there is a bar that has two buttons for each feature:

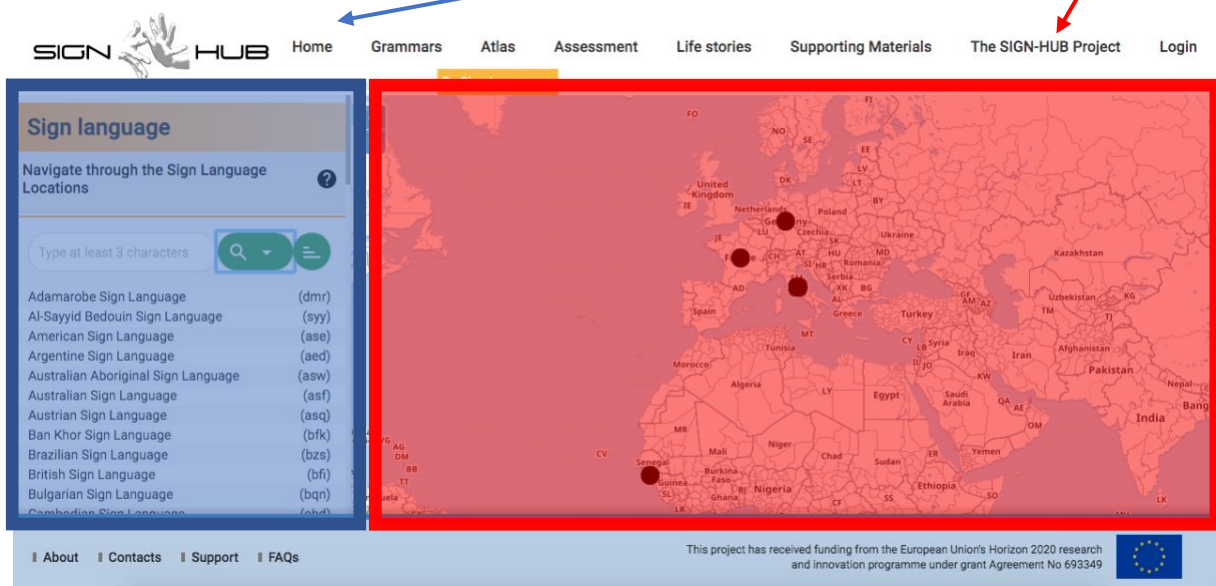

Core vs. non-core lexicon(2/2) Mouth gestures -- function(5/5) Manual alphabet, 1 page(3/3)

By clicking on the button , a pop-up window will appear containing information about the corresponding feature.

By clicking on the button , it is possible to remove the feature from the map and from the navigation respectively.

Atlas by Sign Languages

The Atlas / By Sign Languages page is divided into two sections: navigation (left) and map (right).

Search a Sign Language

The navigation part consists of the search bar with a search button at the right and the list of languages positioned below the search bar.

In the search bar, the user can enter the name of the Sign Language she wants to find.

The user has 4 search modes available:

- Terms: search by language name
- SL code: search by code language
- Countries: search for countries
- Macro-areas: search for macro-areas

The modes are chosen by the first button located on the right of the bar.

The second button is used to sort the languages alphabetically from "a" to "z" or "z" to "a".

Click on a point on the map

The user has the option to click directly on a point on the map to open a pop-up containing the link that will lead him or her directly to the page of this language.

Click on Sign Language

Clicking on a language will open a window with more information about the corresponding language and a search option for features.

The user can explore the list of the features under the language name.

The screenshot displays the SIGN HUB website interface. The top navigation bar includes links for Home, Grammars, Atlas, Assessment, Life stories, Supporting Materials, The SIGN-HUB Project, and Login. A 'By Sign Languages' tab is active. The left sidebar, titled 'Sign language', contains a search bar and a list of sign languages. 'Argentine Sign Language (aed)' is highlighted with a red arrow. The main content area is titled 'Argentine Sign Language(aed)' and features a red-bordered box containing a 'List of Features' with the following categories: PHONOLOGY, LEXICON, SYNTAX, and MORPHOLOGY. To the right of this box, there is a section for 'Socio-historical background' and 'The sign language community', which includes a map of Argentina and information about sign language users, deaf culture, and deaf education.
